## Population

A region's economy thrives or dives because of the people who choose to live there. That choice may occur by being born there and desiring to stay, or a more deliberate one of choosing to relocate from somewhere else. Monitoring change in the size and movement of population is an important barometer of well-being. Some of us monitor these changes as an insect might gauge the shifting sands while most don't pay much attention. But the barometer is a good metaphor for population change since it can presage more notable events, such as lackluster business attraction due to lack of workers.

Population Over Time					
	1988	1993	1998	2003	2008
Total Population	29,948	31,979	33,328	33,130	32,577
Change Since 1988		2,031	3,380	3,182	2,629
Pct. Change Since 1988		6.8%	11.3%	10.6%	8.8%

## Components of Population Change 2007 to 2008

	Number
Net Domestic Migration	-86
International Migration	2
Natural Increase (births minus deaths)	43
Births	394
Deaths	351

A bar chart titled "Components of Change" showing the contribution of different factors to population change from 2007 to 2008. The y-axis represents the number of people, ranging from -100 to 60 in increments of 20. The x-axis lists three categories: Domestic Migration, International Migration, and Natural Increase. Domestic Migration is represented by a blue bar extending downwards to -86. International Migration is represented by a small blue bar extending slightly above the zero line to 2. Natural Increase is represented by a green bar extending upwards to 43.

Component	Value
Domestic Migration	-86
International Migration	2
Natural Increase	43
